Bioengineering is the fastest-growing segment of engineering today and holds the promise of improving the lives of everyone. It focuses on the application of electrical, chemical, mechanical, and other engineering principles to understand, modify, or control biological systems, and educates students to solve problems at the interface of engineering and the life sciences.

**WHAT DO WE STUDY?**
- Biomolecular Track
- Medical Device Track
- Pre-Med Track

**WHERE DO WE WORK?**
- Pharmaceutical Industry
- Biotech Industry
- Medical Device Industry
- Higher Education
- Engineering Entrepreneurship
- and more!
